Spectrum Design Services, Interior Design Intern

experience

Thermo Fisher Scientific | Carlsbad, California

Project is a 21,600 SF T.I. Renovation for a fortune 200 company that is merging two buildings into one. Design includes incorporating existing architectural finishes with new throughout the offices, conference rooms, workstations, and common areas while also assisting the creative team in the development and design of the featured coffee bar and lounge destination.

Mickey Thompson | Stow, Ohio

This company decided to build a new facility to accommodate its growing business. Design services provided interior finish selection and application in a newly created 20,000 SF office space which features spacious open office areas and a custom designed lobby that showcases the company's new branding message and image.

Thermo Fisher Scientific | Los Angeles, California

The TDX project is a refresh of an existing location bringing together two units of the company while transforming the building into a more efficient use of real estate. Bringing down walls and opening up the second floor allowed for the redesign of the office space plan; maximizing conference rooms, offices, workstations, and collaboration spaces. Implementing new architectural features and finishes as well as updated furniture standards provided a fresh look for the company, highlighting customer areas and adding to overall employee satisfaction.

Mantua Manufacturing | Glenwillow, Ohio

This relocation of the company to a new 8,500 SF office facility with 108,000 SF of manufacturing and warehouse space allowed for future growth. Combining the selection of innovative architectural finishes and features with the design development of a functional and efficient furniture plan, the space provides an inviting environment for clients and an exciting new home for the business.

Shannon Lutterbie

Interior Designer
GDOT Design

Ms. Lutterbie is a graduate of Kent State University with a degree in Interior Design. She has been in the industry for the past 10 years working in corporate interior design and furniture planning and specification.
